

## Andrew H.

### Back-End Developer

Stack experience 7+ years

I am engaged in interesting projects. In recent years, I could manage to work as a programmer, team leader, system architect, CTO. Successfully formed a web development team from scratch.

#### Key skills

- ◆ Vue.js
- ◆ Typescript
- ◆ PostgreSQL
- ◆ Node.js
- ◆ Mongo DB
- ◆ Firebase

#### I study

- Python Django
- C#

#### Languages

- Russian
- English - B2

## ANDROMEDA

### About me

Hello everyone! My name is Andrew, I am a backend developer with more than 7 years of experience working with back-end and NodeJS in particular. I also have a lot of experience working with the front end (Vue, Typescript) and with different types of Databases. I like to write the clean code, participate in the business logic of the project, offer the most effective, in my opinion, solutions for optimizing the client side. I can communicate with the customer in English and discuss the business component of the project.

### Stack experience

#### ● Andromeda Web

Frontend dev | Feb 2022 - present

◆ Galaxis.co

Participated in the project of the American startup called Galaxis .

Stack: Node.JS , Typescript, WebSockets, Sas, Redux Toolkit, AWS, Lambda, Dynamo, SQS, SNS, EC2
