Languages

- Russian
- English - B2

ANDROMEDA

About me

Hey there! My name is Ilya, I am a Fullstack developer in the Andromeda team. I like to write clean and readable code. In my free time I am engaged in the development of hard skills. I take an active part in projects with the team. I offer solutions to optimize development processes. I always try to keep in close contact with designers and technical leads.

Stack experience

● Andromeda Web

Frontend dev | Feb 2022 - present

◆ Neft.Expert

I participated in the development of the project called Neft.expert

Stack: React.JS, Express.js, MongoDB, CS, Redux Toolkit, WebSockets, AWS, Lambda, Dynamo, SQS, SNS, EC2
Development of a trading terminal for the St. Petersburg International Commodity Exchange.

At the first stage, it was necessary to develop only a terminal, and the site was handled by another team. The terminal was successfully developed in its original form and gradually acquired functionality. Over time, it became clear that the team involved in the site was not doing its job well enough. After the discussion, we also took over the development of the site itself.

● Spellabs

Front-end dev | Jun 2021 - Feb 2022

◆ Participation in business process automation projects on the Microsoft platform Office 365;

• Layout: HTML5, CSS3, working with layouts from designers;

• Development: JavaScript, React, Redux, Angular

• Teamwork, interaction with

all project participants.

Achievements::

• Translated legacy JS project code to React

• Developed a demo site for the company on React

• Met for the first time and was able to master the deployment of projects on React in a SharePoint environment

• Implemented complex projects on Angular

● Physicon Ltd.
