

Pavel S.

Front-End ReactJS Developer

Stack experience 7+ years

I have extensive experience in developing various systems – from online stores to complex banking products and optimizing them for new requirements. I am ready to take on additional responsibilities to achieve the goals of the team.

Key skills

- ✦ Redux
- ✦ React.js
- ✦ Node.js
- ✦ Next.js

I study

- Go

Languages

- English - C1
- Russian

ANDROMEDA

About me

Hey there. I'm a Fullstack software developer with solid skills in Node JS, Test JS, Docker, React, Next JS, Typescript, Angular and most modern libraries and frameworks on the web.

Stack experience

● Andromeda Web

Senior Front-End Developer | Sep 2023 - Current

✦ Uhealy

Developed front-end part for online medical consultation platform with messenger, call and payment gateway integration.

Technologies stack: React, Redux, Next

● Sphere Partners

Middle+ Software Engineer | Oct 2021 - Sep 2023

I worked on the project of a network of charging stations for electric vehicles. I developed the application of the user's cabinet, automated the feedback system from clients and contractors. Supported old projects and integrated them into the new system. Also, mentored employees and improved the overall quality of the code base by introducing standards.

Technologies stack: React, Redux, Next.js, Node.js, Docker

● SENLA Software Engineering Laboratory

Middle+ Software Engineer | Sept 2019 - Aug 2021

Worked on a banking application using a micro service architecture. Developed shared libraries, maintained brand consistency in design, and optimized the performance of current solutions.

Technologies stack: React, Redux, Next.js, Node.js

● Cronix MicroSystems

Frontend Developer | May 2016 - Sep 2019

Went from a junior to an experienced developer. I received a very diverse experience. The most difficult project was to create an application for television and optimize its operation on devices with limited resources.
